# ARMORED CABLE

The armored cable is a special cable with a stainless steel tube inside the cable which could protect the fiber bite by ant, mouse related rodent animals.   This cable could be used as normal electric wire.

Structure

Material:

➢   Fiber type: G652D,G657,G655,OM1,OM2,OM3,OM4

➢   Cable OD:2.0mm,3.0mm,3.3mm，4.0mm,5.0mm,8.0mm

➢   Jacket material : PVC or LSZH

Features:

➢   High anti-tensility; High anti-pressure

➢   High bent Resistance; Anti-bite from rodent animals

➢   Small OD stainless steel protection tube

➢   Don't worry about damage in project

➢   Easy to maintain

➢   USE as normal soft cable.

Application:

Armored patch cord pigtail assemblies.

Cabling installation on floor, wall corner and main communication line.

Other ODN, FTTH project.
